Summary

Entry-level **Software Engineer and Full-Stack Developer** with hands-on experience designing, developing, testing, and supporting applications using **C#, .NET Framework, Java, JavaScript, React, Node.js, SQL, and RESTful APIs**. Strong foundation in **object-oriented programming, data structures, algorithms, relational databases, cloud technologies, debugging, testing, and scalable application development**. Experienced collaborating with distributed technical teams and stakeholders to translate requirements into reliable, maintainable software solutions.

Education

Bachelor of Computer Science Sept/2022 – Sept/2026
Dalhousie University *Halifax, NS*

Skills

Programming: C#, Java, JavaScript, Python, C, SQL, HTML
Software Development: .NET Framework, React, Node.js, Express.js, RESTful APIs, Web Services, Server-Side Development
Databases: SQL Server, SQL, MySQL, MongoDB, Relational Databases, Schema Design, Data Integrity
Software Engineering: Object-Oriented Programming (OOP), Data Structures, Algorithms, SDLC, Testing, Debugging, Troubleshooting, Git
Cloud & Tools: Microsoft Azure, AWS, Google Cloud Platform, Power Apps, Power Automate, Docker, GitHub, Firebase, PowerShell
Professional Skills: Agile Development, Requirements Gathering, Cross-Functional Collaboration, Technical Documentation, Problem-Solving, Communication, Self-Motivation, Leadership
Certifications: Cisco Certified Network Associate, Microsoft Azure Fundamentals (AZ-900), Web Development, Python

Experience

OBT IT Analyst (***Technical Solutions, Azure, Business Analysis***) Jan 2026 – Present
Irving Oil (Operational Business Technology - Solutions) *Saint John, NB*

- Collaborated with business and technical teams to understand **requirements, workflows, and system dependencies** and translate them into technical solutions across enterprise initiatives.
- Supported the Eastern Canada Paperless Pilot by gathering user feedback, **troubleshooting application and workflow issues**, and improving user experience.
- Supported the **Microsoft Azure** migration by maintaining application dependencies, network topologies, and technical documentation.
- Supported enterprise application migrations by analyzing ownership, integrations, licensing requirements, and technical dependencies.
- **Debugged and troubleshot** operational data and application issues within GE Meridium systems to support reliable workflows.

Network Analyst Co-op (***SolarWinds, Cisco ISE, ServiceNow***) Sept 2025 – Jan 2026
Irving Oil (IT Infrastructure - Network) *Saint John, NB*

- Improved **SolarWinds monitoring dashboards** for Network and Service Desk teams, improving system visibility, reliability, and infrastructure monitoring.
- Added, configured, **tested, and validated** network nodes to maintain reliable monitoring coverage across enterprise infrastructure.
- **Troubleshot and debugged** monitoring and configuration issues using SolarWinds, Cisco ISE, and ServiceNow.
- Gathered requirements from Service Desk and Cloud teams and translated them into **monitoring solutions and dashboards**.
- Maintained **technical documentation** covering configurations, troubleshooting findings, and infrastructure changes.

Backend Developer (***JavaScript, Node.js, React, SQL***) March 2025 – Sept 2025
Worsship (Remote)

- Designed and developed a **scalable Node.js and SQL backend** supporting centralized data management for an international organization.

- Collaborated with developers, designers, and global stakeholders in a **distributed Agile development environment** to translate product requirements into software solutions.
- Designed and optimized **relational database schemas** while applying database-design and data-integrity principles.
- Developed, integrated, **tested, debugged, and troubleshot RESTful APIs** connecting React interfaces with backend services and databases.
- Participated in technical reviews and documented development decisions to support **clean, reliable, and maintainable software**.

IT Technical Assistant Co-op (***.NET, SQL, Power Automate***) Jan/2025 – Apr/2025
Dalhousie University *Halifax, NS*

- Planned and developed **Power Apps and Power Automate flows using .NET Framework and SQL** to automate internal processes and reduce repetitive administrative work.
- Gathered requirements from faculty, staff, students, and researchers and **translated business needs into application, workflow, and database solutions**.
- Built, tested, maintained, and **troubleshot Power Platform applications, workflow logic, integrations, and data-processing issues**.
- Provided cross-platform technical support across Windows, macOS, and Linux, resolving **software, hardware, network, authentication, and application issues**.
- Supported **RT and LDAP-based systems**, software deployment, device configuration and mentored Microsoft 365, printers, AV equipment, and university computing services.
- Managed technical requests and documented **solutions, configurations, troubleshooting procedures, and workflows** to improve knowledge sharing and support consistency.

Data Analyst Intern (***Python, MySQL, GitHub, JavaScript, Power BI***) Dec/2021 – Sept/2022
Dresma.ai *Delhi, India*

- Analyzed and validated datasets using **Python and MySQL**, troubleshooting data-quality issues and supporting reliable application workflows.
- Documented ETL processes, database workflows, and technical procedures to support maintainability and team knowledge sharing.
- Created Excel and Power BI reports to communicate findings to technical and non-technical stakeholders.

Software Development Projects

Junior Software Developer (***SQL, React, Node.js, JavaScript***) Apr/2024 – Sept/2024
DalChess Code

- Designed and developed a **full-stack tournament administration application** using React, Node.js, JavaScript, and SQL based on stakeholder requirements.
- Developed and **tested, troubleshot, and debugged REST API**, backend, database, and data-display functionality to improve reliability.

Full-Stack Developer (***React, Node.js, Express.js, MongoDB***) Sept/2023 – Dec/2023
Jobify - Job Tracker Webpage

- Designed, developed, and deployed a **full-stack web application** using React, Node.js, Express.js, and MongoDB with secure user accounts and persistent storage.
- Tested and debugged frontend, backend, **REST API, authentication, and database functionality** to improve application reliability and performance.

Mobile App Developer (***Android Studio, Java, Firebase***) Jan/2024 – Apr/2024
Quick Cash - Marketplace App Link

- Designed, developed, and tested an Android application using **Java, OOP, and Firebase cloud services**, troubleshooting application, notification, and real-time data issues.

Extracurricular Activity

Software Team Member - Dalhousie Combat Robotics Team Sept/2024 – Present

- Maintained team web infrastructure and collaborated on **software troubleshooting, debugging, system updates, and code review**.

Course Representative - Server Side Scripting (CSCI 2170) Sept/2023 – Dec/2023

- Gathered, documented, and communicated student requirements to support course improvements and effective **stakeholder collaboration**.
